

Health Equity Collective

Launched in 2021, the Health Equity Collective is a cooperative enterprise of support for organizations seeking to help stop the trajectory and minimize the impact of health care inequality. This initiative builds on ASH's work over the last decade and holds the promise of what the Society can do in the future with partnering organizations.

ASH Corporate Friends

The Corporate Friends Program is an opportunity for true partnership and open dialogue with the American Society of Hematology and offers an exclusive opportunity to form strategic connections while fostering excellence within the field. The program offers pioneering companies an opportunity to invest in the field of hematology on an annual basis.
